

- We also recommend that you download the optional Socio App by accessing this [link](#) from your smartphone, iPad or tablet. After entering your email address, name, etc., you will be asked to search for an event **or** whether you have a code. Use the code option and enter the access code (contact AJL Conference Registrar [Marcie Eskin](#) to receive this access code). **Again, do not share this access code with people who have not registered for the conference, as it is unfair to those who paid for it.**

- From the app you can create your profile and personal agenda, participate on the discussion board, and connect with other attendees. Note that it is possible to participate in the conference without using the app at all, but the app will give you a more well-rounded experience.
- Please allow for **notifications** on your phone or tablet so that you will receive conference announcements in real time.
- Please make sure to refresh your website a few times a day during the conference, because when new things are added, like bios, photos, or handouts, they will not appear unless you refresh. Same thing must be done within the app.
- To attend sessions through the website or the app, click on the **Schedule**. Click on any conference date along the top, then click on any session to see details and find the Zoom link. Click on that link to enter the session. After each session ends, a link to a recording will appear.
- To get the most out of our upcoming conference and enjoy the experience with our new Socio App and also learn how to navigate Zoom, please attend our first session on Sunday, June 28, at 11:00am EDT **“How to Use Socio & Zoom.”**
