

OCLC Updates

Nathan Putnam

Description: This presentation will cover updates to cataloging policies and practices, as well as selected highlights of OCLC products and services.

Nathan Putnam is the Director of Metadata Quality at OCLC and oversees the teams of specialists working on data integrity and quality for the WorldCat bibliographic database, knowledge base, and registry. He has over fifteen years of cataloging experience working in multiple academic libraries as cataloger and manager and enjoys discussing cataloging trends and issues with the wider metadata community.
